Profile Summary

Experienced Software Developer with expertise in Node.js, PHP, and Vue.js, aiming to master end-to-end development while remaining adaptable in leveraging the best-suited technologies to build scalable and efficient solutions.

Experience

Linways Technologies Pvt Ltd

May 2024 – November 2024

Junior Software Developer

Kochi, Kerala

- Collaborated with senior developers in developing, testing, and maintaining applications using **Vue.js, PHP, and MySQL**, applying **OOP** concepts and data structures to improve efficiency and scalability.
- Designed and implemented a dynamic query generation feature, enabling consultants to duplicate forms with a single click. Automated data retrieval and insertion across multiple tables and databases, reducing form setup time by 80%.
- Designed an entity-relationship table to dynamically feed data from forms based on the selected entity, streamlining data management and making the data migration process easier and more efficient.
- Contributed to enhancing and fixing bugs in multiple existing features.

DotPeedika TechLabs LLP

January 2025 – present

Software Developer(Project-based)

Software Developer(Project-Based)

- Collaborated with DotPeedika on a restaurant management project, focusing on order processing, payments, and inventory tracking.
- Developing full-stack solutions, improving operational efficiency for restaurant owners.

Projects

Easily- Job Portal | Node.js, Express.js, ejs

December 2024

- Developed a feature-rich Job Portal using Node.js, Express, and EJS that connects recruiters and job seekers efficiently.
- User Authentication: Secure login system for recruiters.
- Recruiter Dashboard: Allows recruiters to post job listings, manage applications, and track candidate responses.
- Job Seeker Portal: Enables applicants to browse jobs and apply by uploading their resumes.
- File Upload: Integrated Multer for secure resume uploads and storage.
- Email Notifications: Automated emails using Nodemailer for application updates.
- Dynamic UI: EJS templating for responsive and interactive job listings.
